

Appendix 3: Mapping Tool Submissions

Legend:

- Included in the capital budget already
- Aligned with Council's strategic priorities
- Other Project Ideas for Council's Consideration (currently not in the budget)

OBJECT ID	Resident's comments on the Interactive Map		Administration's Suggestion
	PROJECT IDEA RECIEVED ONLINE	ACTION	
31	Eliminate/disband the CUI	have City Hall accept/take back their municipal responsibility to provide it's citizens the services due without having a separate parallel empire exist with extra and excessive cost of infrastructure (fleet of vehicles, offices, equipment), CEO and staff and making profits off of our taxes!	A consultant was retained to provide the alternative options for CUI. According to the Strategic Plan, the decision will be made by Council by Q2 2019.
24	Chestermere Blvd Revamp (Pathways, Parks, Fences)	Have a full pathway system along our main roadway, be instantly attracted to our vibrant city, easily move through our different communities, be visually attracted to our city.	Pathway development along Chestermere Blvd from Rainbow Road to Invermere Drive is included in the proposed 2019-2022 budget. The fences are already in place. There is not enough land along the road for park development.
39	Repair the path alongside the road on the bridge	It is not smooth and varies in width so is difficult for many to navigate	This will be done together with the bridge widening in 2025
32	Lay a road connecting this area towards 16th	access the highway without going around	The developer of the land at the SE corner of Hwy 1/Paradise Road will construct the connection to Paradise Road according to their subdivision approval condition in the future.
26	South Lake Park	Have a place at the south end of the lake to use rather than going all the way to the busy beach park	The Southshore Lakefront project design is included in the proposed 2019-2022 budget.
27	Pathway	Have a pathway that connects Kinniburgh to the rest of Chestermere and avoid having to run/bike on the road	The Southshore Lakefront project design and Master Trail Plan are included in the proposed 2019-2022 budget. These two projects will connect Kinniburgh to the rest of the City.
30	Create bike lanes where there are no paths	decreased use of vehicles in the City, safe for riders	It will be considered in the Trail Study which is included in the proposed 2019-2022 budget.

44	Connect disjointed pathways separated by a chain link fence	Move safely from dead end sidewalk to canal pathway at south end of Rainbow Road without having to walk into traffic. Simple fix I think.	PMO is working on the problem now. It will be done by the end of 2018.
33	Deepen the lake to fix the weed problem and at the same time use the soil for a mini ski hill	Allow the lake to be weed free and use the soil for another project such as the mini ski hill for children like prairie winds park in Calgary.	Staff will take this into consideration into the Lake Strategy project. The report was included in the proposed 2019-2022 budget.
42	Dredge the lake to a depth that won't support weed growth	Enjoy the lake and new beaches without weeds, slime, & potentially toxic algae ruining the experience and values of all properties in Chestermere. With the arrival of aggressive aquatic noxious weeds like Flowing Rush, there has never been a better time. We are spending more and more dealing with a growing problem when we could solve it completely making for a more enjoyable and desirable place to live and play.	
53	Dredging of the lake for the reduction of weeds and also some areas are getting quite shallow.	enjoy this beautiful lake. This community is built around the lake and some attention and care should be put towards this lake.	
57	Dredge lake	Enjoy better	
52	A Seniors' Care Facility	So that our senior citizens have somewhere to live when they can no longer live in their own homes so that they are not forced to move in to Calgary, or to some other rural facility, leaving their community, friends, and even their spouses and other family members behind. An assisted living facility is one gap in what Chestermere offers its residents, not just for its aging residents but for ALL of us who may some day need it. Ideal location: the land next to the Rec. Centre.	
47	Swimming Pool	Swim	The City is entering into discussions about tri-municipal recreation planning. These recreational facilities will be discussed. Recreation Planning is included in the proposed 2019-2022 budget.
34	Build a pool maybe around here.	Access a pool, create jobs, and develop the area around here since it is a more isolated spot in Chestermere.	
59	An actual Recreational Centre encompassing indoor and outdoor sports and fitness!	So help contribute to people of all ages to have a healthy and happy lifestyle!	

60	To have a multifaceted facility that includes a larger public library (our current one is bursting at the seams), a museum, and an arts department as well as multi purpose meeting rooms!	Libraries are the heart soul of the community and with the inclusion of the Arts and a museum it will make it an all around cultural centre and gathering place for our community! If it is located near the Aging Place Facility and Seniors Centre and hopefully the youth centre, it would become the place to be in our community!	
22	Traffic Circle by Timmies	Safely move through this intersection	Public feedback which does not relate to current or proposed capital projects will be considered by staff and Council in the subsequent funding cycle. Once evaluated, a follow up report with responses and/or explanations will be provided to the public.
23	Traffic Circle at Chestermere Station Condos	Not have to stop at the stop signs because many people do a "rolling stop" anyway. There would also have to be a flashing light for pedestrians here or a deviated crossing.	
29	To include more flashing lights at high traffic crossings	Helps to make people especially children more visible while crossing	
40	Fix the sidewalk ramp on Merganser where it crosses Mclvor	The wheelchair access is 3 inches high so it can't be used to cross the street	
38	Restaurants facing towards the lake between City Hall and Booster Juice/Tims	Allow taxpayers to dine and see the water as lakefront homeowners can do	
43	Lake Front Board Walk Retail & Restaurants.	Enjoy a creative destination for gathering, shopping, eating, and building community. We have precious little lake front left, if developed at all, it should not be for homes, but for community and retail. We have no Main Street or downtown that would attract boutique businesses, a lake front boardwalk would be creative and inviting for visitors.	
25	To turn the multi-use off-leash area into a park, beach area similar to Anniversary Park and relocate the off-leash dog park making it only for people with dogs and not multi-use.	Have more lake access, specifically for those not living on the lake.	
28	Add a beach to Sunset Park	Have an alternative beach park to use	

37	Adding sand to the waterfront at Sunset Park	Use it as another public beach, to bring visitor dollars to the area
50	Pathway from West Lakeview Place to connect to West Chestermere Dr to West Lakeview Point paths	Safely use this walkway without having to navigate a grassy hill. West Lakeview place walkway does not connect to any pathway and in winter is especially dangerous to use due to ice and snow on the hill.
51	Create an outdoor rink maintained by community volunteers	Have an outdoor rink space to replace ponds that our children can no longer use
45	Playground in On the south side of the city	Residents in South West Rainbow Falls have the least access to a playground in the city. Some kids are over a km walking distance from a swing or slide.
46	A Tree Planting Campaign	Enjoy a green and lush city in future years. Areas under the huge power lines could have orchards and lush walking paths, bare boulevards could have trees and new developments could plant more. Trees are a simple way to increase a sense of beauty and pride of place. It is a long term vision worth investing in.
48	Transportation to Calgary	stop using their cars
55	Public Transportation hooked up to Calgary Transit	Reire in Chestermere once they have lost their cars and/or drivers license
49	To provide more social service programs for area residents	Enjoy peace of mind knowing that if they need help its available.
41	public transit Uber	Hire Uber to act as public transit. Just like Innisfil ON. https://www.nytimes.com/2017/05/16/world/canada/a-canadian-town-wanted-a-transit-system-it-hired-uber.html
54	repairing what the city has ruined since the road construction on East & West Chestermere drive.	get into their driveways without causing damage due to the high curb also the grass in the driveway is a no brainer .

Public feedback which does not relate to current or proposed capital projects will be considered by staff and Council in the subsequent funding cycle.

Once evaluated, a follow up report with responses and/or explanations will be provided to the public.

56	Create a Heritage Authority for the City of Chestermere	So that the City is invested in helping other organizations preserve and educate about the fascinating history of Chestermere. At the present time, The Chestermere Historical Foundation is doing its best, but it is a volunteer group, and Chestermere City like many others its size, need to have a formally set up authority to assess, and possibly designate historic features. "You don't know where you live until you know its history."	Public feedback which does not relate to current or proposed capital projects will be considered by staff and Council in the subsequent funding cycle. Once evaluated, a follow up report with responses and/or explanations will be provided to the public.
35	I suggest a fee for parking at the REc Centre for non-residents. A resident could get a sticker or something similar to the boat launch.	So that the parking lot could be paved the \$\$ collected.	
58	School, school, school! We are out of space and at capacity at all schools and we are only growing so need somewhere to place them	Go to School! Where are we going to accommodate the new registrations for school and new developments when all existing schools are at capacity
